Discover the Keys to Excellence in Education Thinking & Learning Styles Training

Providing Teachers and Students Skills for Success . . .

How to Increase Student Test Scores and Reduce Classroom Conflict Learn What Students Pay Attention To and How They Learn Best

With the new discoveries of how the brain processes information, teachers and educators have new tools available in their quest for Excellence in Education. A Whole Brain Learning model has emerged along with the development of a Thinking and Learning Styles Technology.

Set Your Educational Achievement Goals with Confidence

During training sessions participants will gain insights into how students and staff think, learn and communicate. This awareness will enable participants to harness the power of an individual's unique thinking style improving classroom productivity and achievement. Participants will also uncover student and teacher strengths and resources that may have previously gone untapped. The training uses practical applications designed to enhance the classroom learning climate.

Here's a Peek inside the Training

Brain Dominance Basics: Applying Whole Brain tools and techniques for optimal learning.

Brain Communication: Learn how to effectively communicate with each thinking and learning style preference.

Brain Conflict: Understand the 4 primary tactics that a person will use when brain preference is not honored and how to best resolve the conflict.

Individual Profiles: Online scoring of individual profiles are reviewed during the training.

Brain Team Analysis: Discover how teams can achieve high levels of performance by compiling and reviewing the scores of each team member.

Giving our young people, our future leaders, the skills necessary to create organizations, businesses, governments, and a world where everyone's needs matter and can be met.
